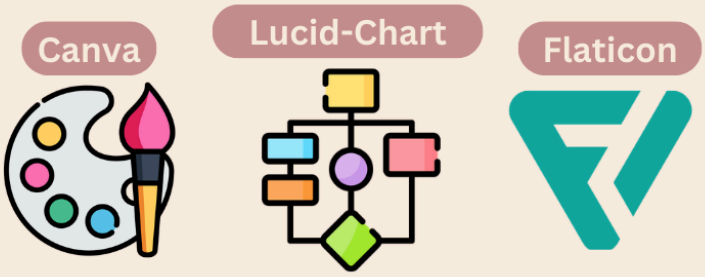
Overview

Audio

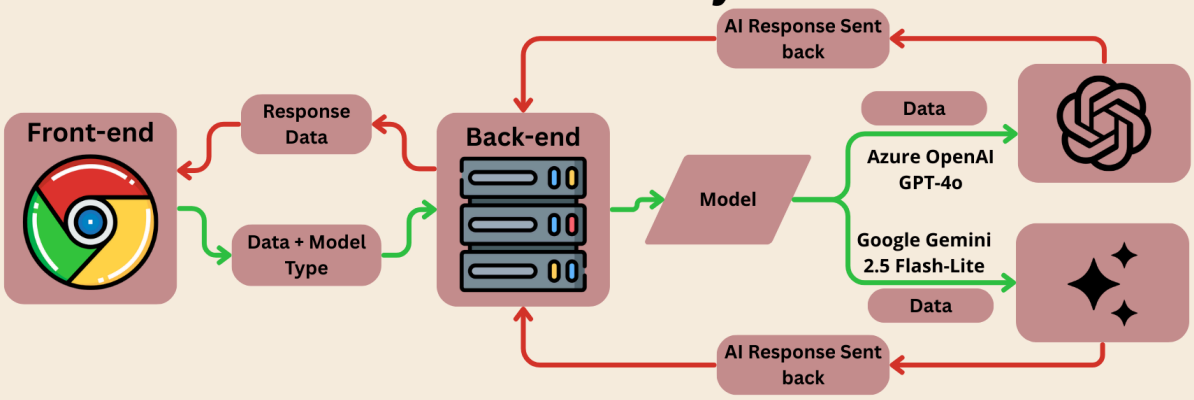
The audio files are from Pixabay and Figshare

Third-party tools



Graphics were made with the use of Canva, Lucid-chart, and Flaticon.

AI Courtesy



AI wasn't used to generate code or give ideas. Briefly only makes API calls to AI.

AI Courtesy

No code was generated with the use of Artificial Intelligence.
All code made for Briefly was written by our team.
All the software was programmed by individual members to make the API calls to AI and move the data between the front and back end. Briefly only makes API calls to Artificial Intelligence so it can summarize a webpage or analyze a user prompt. Our software then processes the response so it can perform a useful function.

Icons

All icons were taken from a website called Flaticon

- Icons Created by Freepik
    - Man pushing boulder icon (challenge)
    - Paper icon
    - Internet Icon
    - Ear Icon
    - Finger snapping icon
    - Audio File Icon
    - Server icon
    - OpenAI logo Icon
    - Color palette icon
    - Flowchat icon
    - Flaticon logo icon
    - Chrome Browser icon

    - Measuring tape icon
- Icons made by individual authors
    - Gold medal icon by Vectors Market
    - Preferences icon by ranksol graphics
    - Gemini Icon created by Graficon
    - Speak icon by yut1655
    - Artificial Intelligence brain icon by rlkas Dzihab
    - Customization icon by “th studio”
    - Error handling icon by herikus
    - Prototype icon by surang
    - Advice icon by Dewi Sari

AI Model links

The software uses specific AI Models from OpenAI and Google

- GPT-4o
- Gemini 2.5 Flash-Lite

Audio

The audio files are from Pixabay or Figshare.

Pixabay

- Start effect by FoxBoyTails
- Alert effect by Dragon Studio
- Pause sound by Dragon Studio

Figshare

- Stop effect by Cao Zijing

Third-party tools

Our documentation is made simple thanks to neat pictorials that were developed in Canva or Lucid-Chart. Icons used to enhance those graphics were taken from Flat icon and are cited above.

- Canva
- Lucid Chart
- Flaticon
