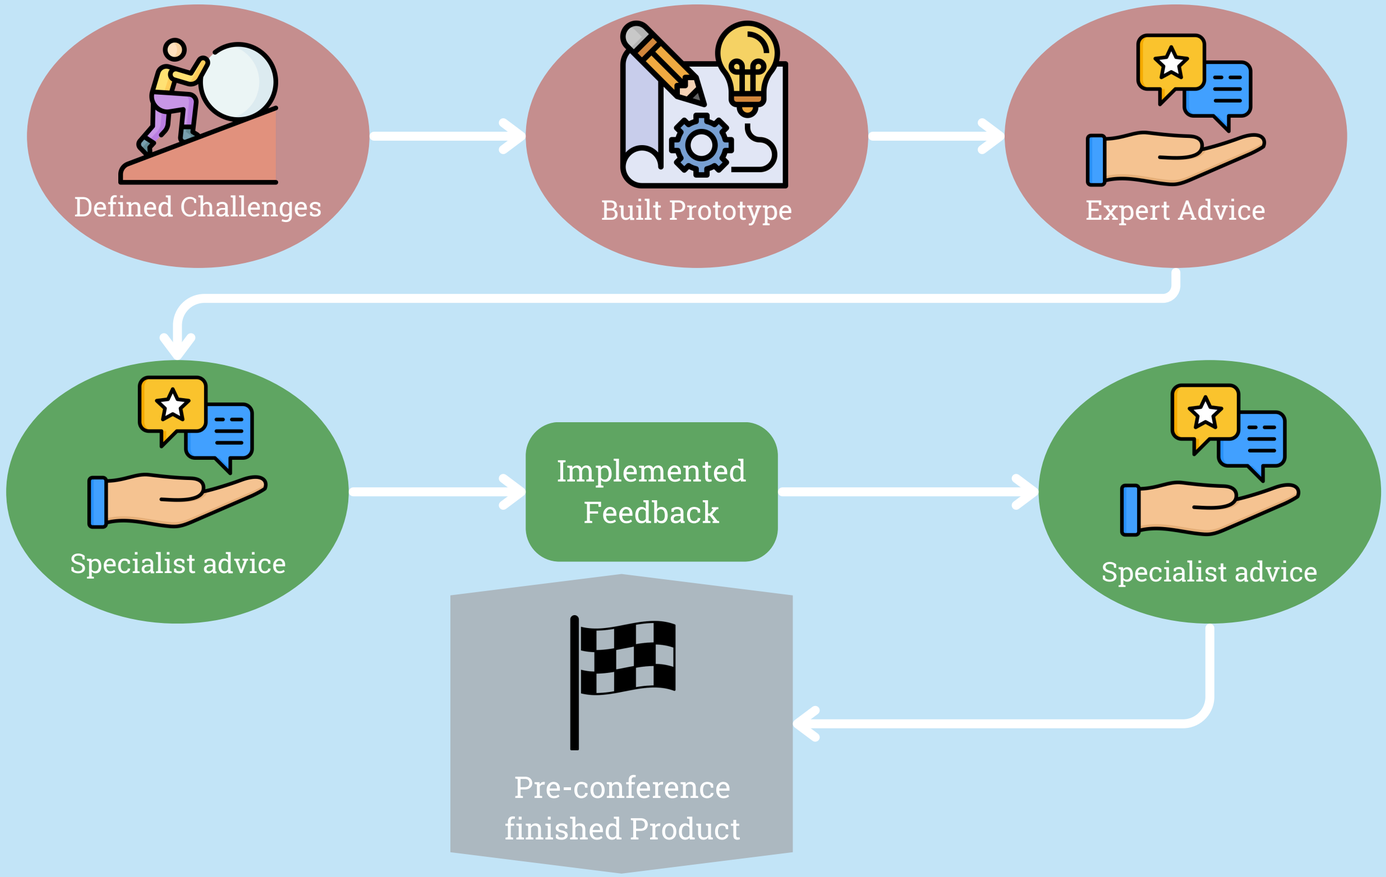
Briefly

An app designed to assist the visually impaired by saving them time through summaries and navigation using an AI Agent named Rosie.

Requirements

Functional	Non-Functional
Summarize a webpage	Easy-to-learn key commands
Summary Customization	Pleasant sounding screen reader voice
Navigate websites, help compose email, and query searches	Error Handling

Design



Testing

Sumarization Testing

Responses
Concise and easy to understand

Summary Type
Paragraph mode produced massive output

AI Model
Gemini produced superior summaries to OpenAI but ignores Navbar, Header, and Footer content.

AI Agent Testing

Responses
Responded logically to each question

Browser Operations
Performed every browser operation requested.

AI Model
Gemini produced output that caused errors

There's lots more to enhance, but currently this product serves as a good foundation before the conference
